

## Full Body Massage

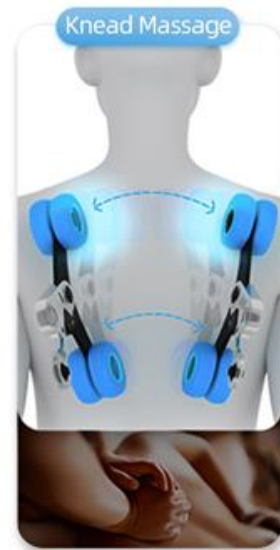

iRest A306 Full body Massage Chair which features 3D rollers, air massage, zero gravity, foot rollers, back heating and body scan at an affordable price.

## AI Voice Control

Easy control your massage by simply telling the A306 your program selection.

## Smart 3D Rollers

The A306 is equipped with soft quad style rollers to mimic the feel of human thumb, thereby enhancing the massage experience. The rolling manipulation helps dredge the main meridians on the back, acanthus, forehead and the top of the head, along which the acupuncture points are distributed, to clear the collateral channels.

## SL Double Tracks

The A306 is able to integrate a 53" SL-track roller with its 3D soft touch rollers. The rollers will follow the curvature of your spine from the neck down to wrap around the glutes in order to give you full coverage where you need it most.

## Zero Gravity Function

There are 3 stages of zero gravity, the 3rd being more reclined. When reclined fully, your legs are higher than your heart level, resulting in therapeutic effects that are incredibly effective and may be felt immediately.

## Bluetooth

The A306 is equipped with Bluetooth technology that allows the user to listen to their favorite music and phone calls on high quality speakers in the headrest.

## Instant access

The A306 has quick access buttons on armrest for easy access.

## Leg Extension

The calf and foot massager can make adjustments according to each individual's leg length.

## USB and Phone holder
