## Auto Body Scan System

Auto body scan refers to your body height, weight and spine data detection, then adjust a proper massage position to match your neck, back, waist and so on. The smart system scans your back and delivers a message that contours the unique spine curve of each individual user of the chair.

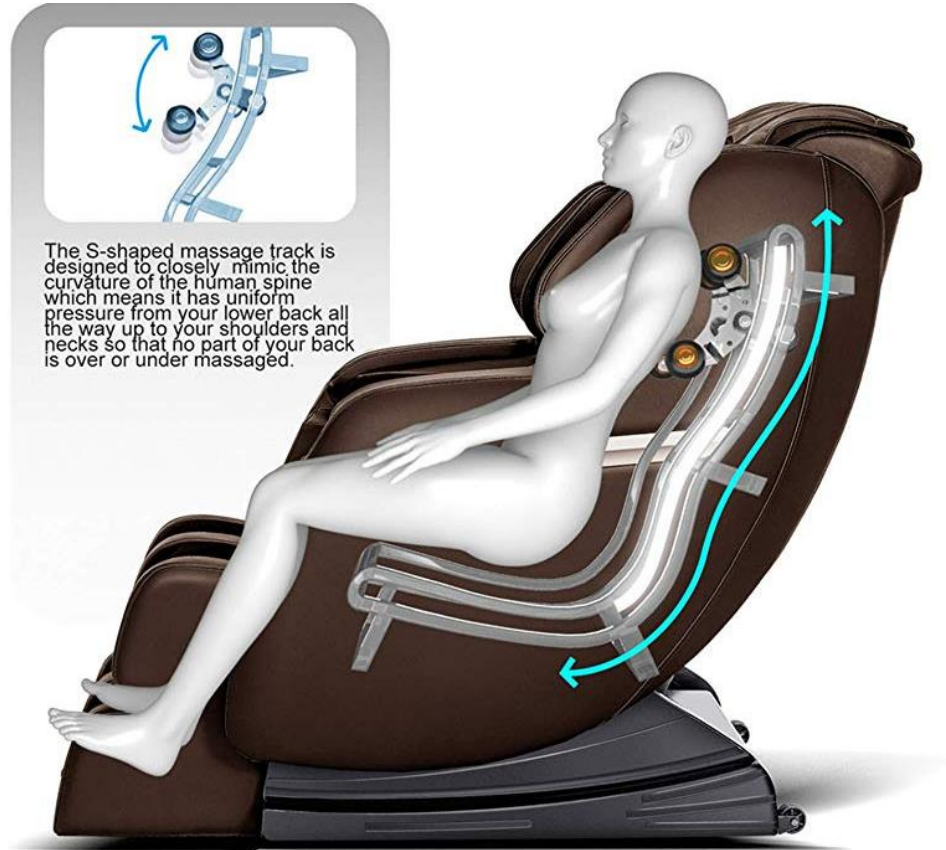

## Intelligent mechanical hands

Intelligent mechanical massage hands constantly collect data on the curve of the back, emulating massage techniques employed by professional massage therapists, in order to offer you a stereo, multidimensional aspect massage. The intelligent massage hands emulate the methods used by professional massage therapists, in order to perform the following types of massage: kneading, squeezing, flapping, pressure, pushing, gripping, swinging and twisting.

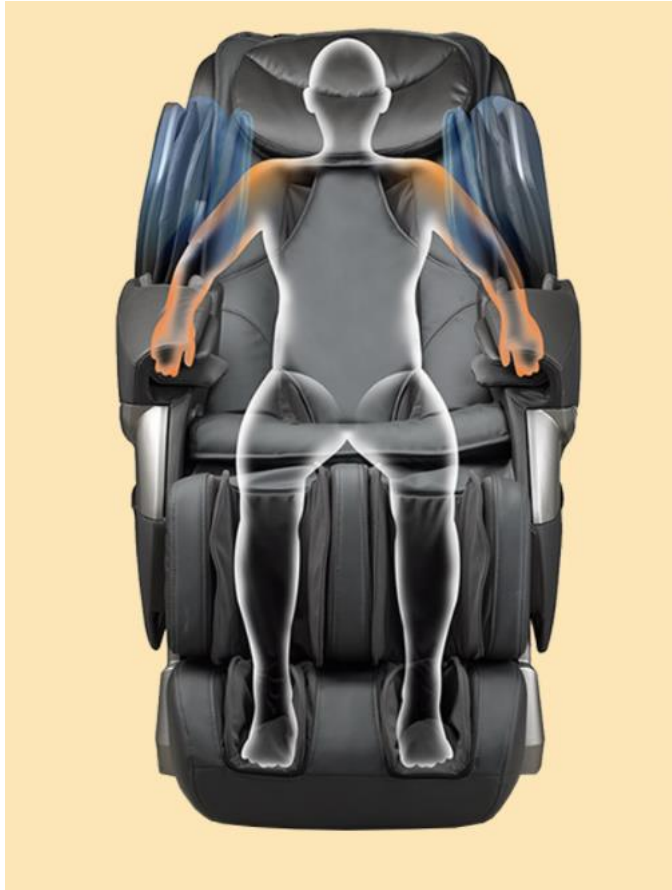

The intelligent mechanical massage hands can move up and down on the neck, shoulders, back, and waist. They can automatically induce the specific curve of the human back, with a width range of 21 cm and a back range of 135 cm, which covers the entire back. The width can be adjusted from 6 to 21 cm, with three width options.

## S-Track

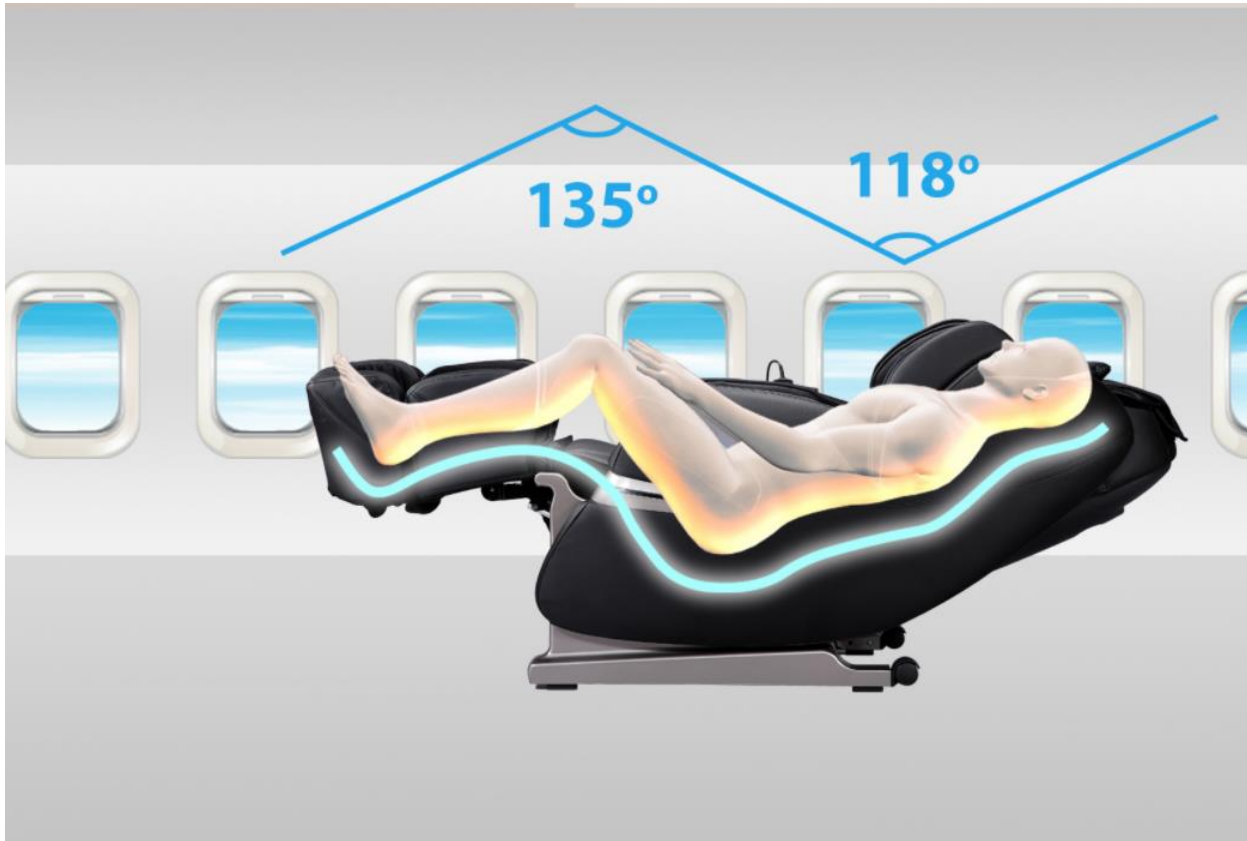

The S-shaped curve that supports the body involves a combination of back massage structures and human engineering principles, so that you may enjoy a highly accurate back massage. It provides support to both your neck and back, especially the lumbar area. This position increases the effects of massage as it enables each disc of our spine to individually separate and decompress, allowing nutrients to enter disc tissues.

## Full Body Air Compression Massage

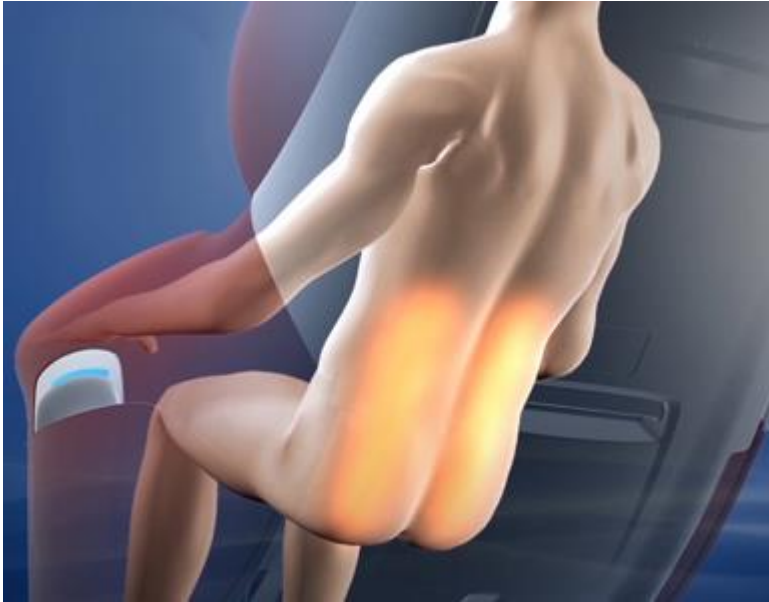

The air bags offer a compression massage to the neck, shoulder, arms, thighs, calves, and feet. In the manual settings, you can independently turn on and off any region of the airbags.

## Zero Gravity

There are 3 stages of zero gravity, the 3rd being more reclined. When reclined fully, your legs are higher than your heart level, resulting in therapeutic effects that are incredibly effective and may be felt immediately.

## Carbon Fibre Heating

Heat is provided to the lower lumbar region of the spine which helps relieve lower back tension and relax the underlying muscles and joints

## Auto Massage Programs

	<b>FULLBODY-RUSH GROUP</b> Intelligent 2D massage system combines professional massage techniques to massage chairs to achieve multi-dimensional and aspect massage, to help relieve your fatigue after a long day of work.		<b>STRETCH-BEAUTY LOVE GROUP</b> Designed for relieve pain and stiffness on muscle specially, similar to scraping therapy, stretch back muscle, loosen muscle and bones, relieve fatigue.

A188 features a variety of different automatic massage procedures designed by our massage experts. Each automatic program is unique, and each program provides a different massage style. Some may focus more on kneading, while others may focus more on tapping. The intensity of the massage will also vary from the programs. There are healthcare, relaxation, sleeping, and so on. They can help you get a quick massage

## Foot and Calf Massage

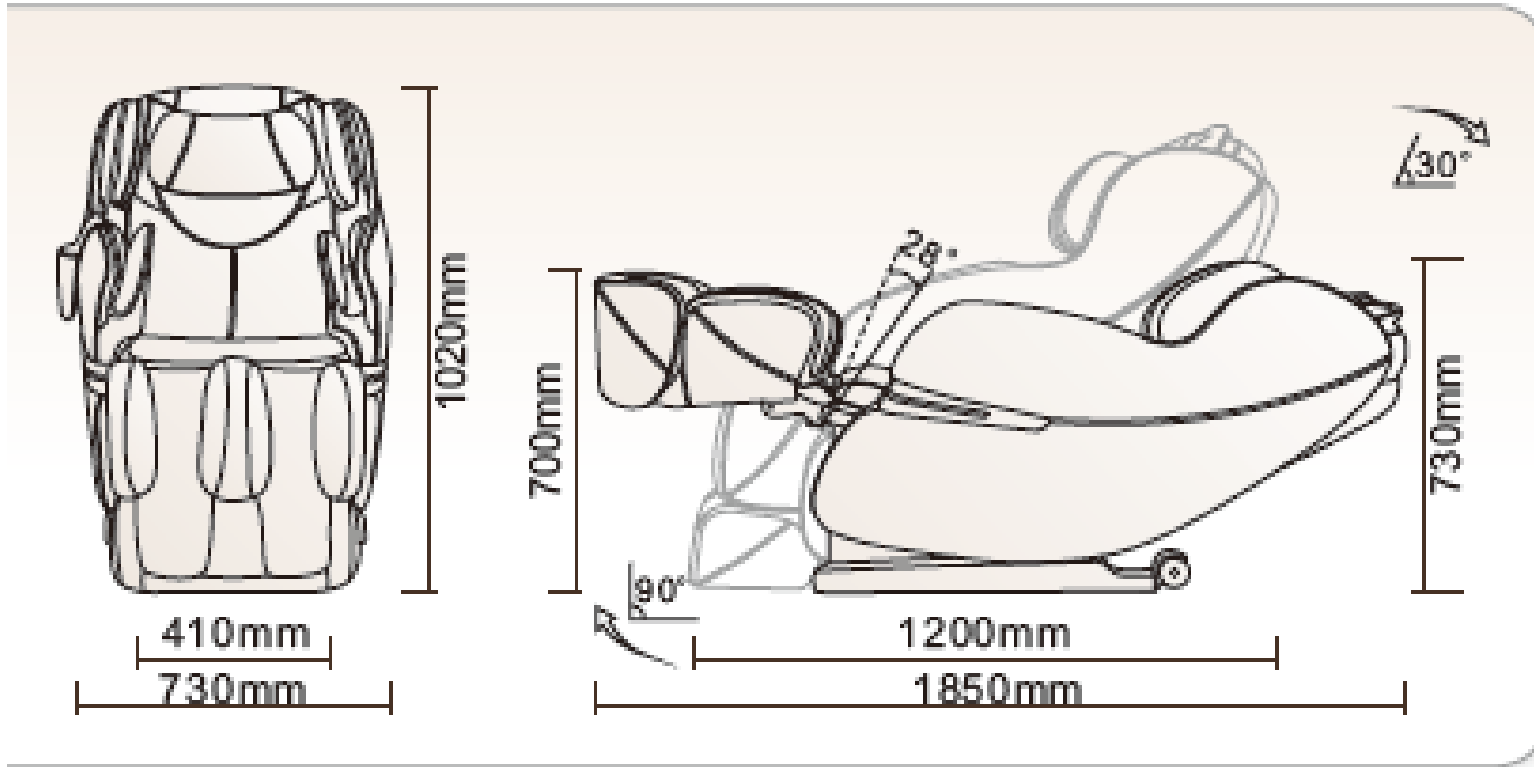

There are multiple air bags along the sides and back of the legs and feet which inflate to apply a compression massage. As the kneading reflexology rollers work on the bottoms of your feet, the air compression massage will squeeze away tension, leaving your feet feeling refreshed and renewed.

## Extendable Footrest

The calf and foot massager can be adjusted according to each person's leg length.

- Model A188
- Massage Robot 2D Rollers
- Rated Voltage 110V ~ 60Hz
- Rated Power 120W
- Maximum Load Weight 330 Lb
- Recommended Height Range 6'3"
- Auto Time 15/20/25/30 Minutes
- Total Airbags 38
- Recline Angle 90-170 Degree
- Gross Weight 155 lb
- Shipping Box Dimensions 40\*20\*13  
48\*23\*11  
42\*24\*19
- Product Size 47.25" x 32.28" x 40.16"
- Required Recline Clearance 2.9"
