(2)

Method of usage

7. Floor protection

Long-term heavy pressure on the massage chair may cause scratches on the floor. This can be avoided by placing a carpet or other cushioning medium under the chair.

Notice

Do not use the caster to move the machine on uneven ground or places with small space. If you want to move, you must lift it by two or more people. When lifting, use the front seal of the footrest and the groove of the back cover as a landing point (do not lift the support directly).

9. Move method

After confirming that all the cables are far away from the ground, pull the backrest back to a certain degree (when the center of gravity falls on the pulley), then you can push the chair back and forth with your hand, and then gently support the chair back to the normal position.

Notice

When moving, be sure to turn off the power switch before unplugging the power cord and the connection cord of the remote .
